Detailed View

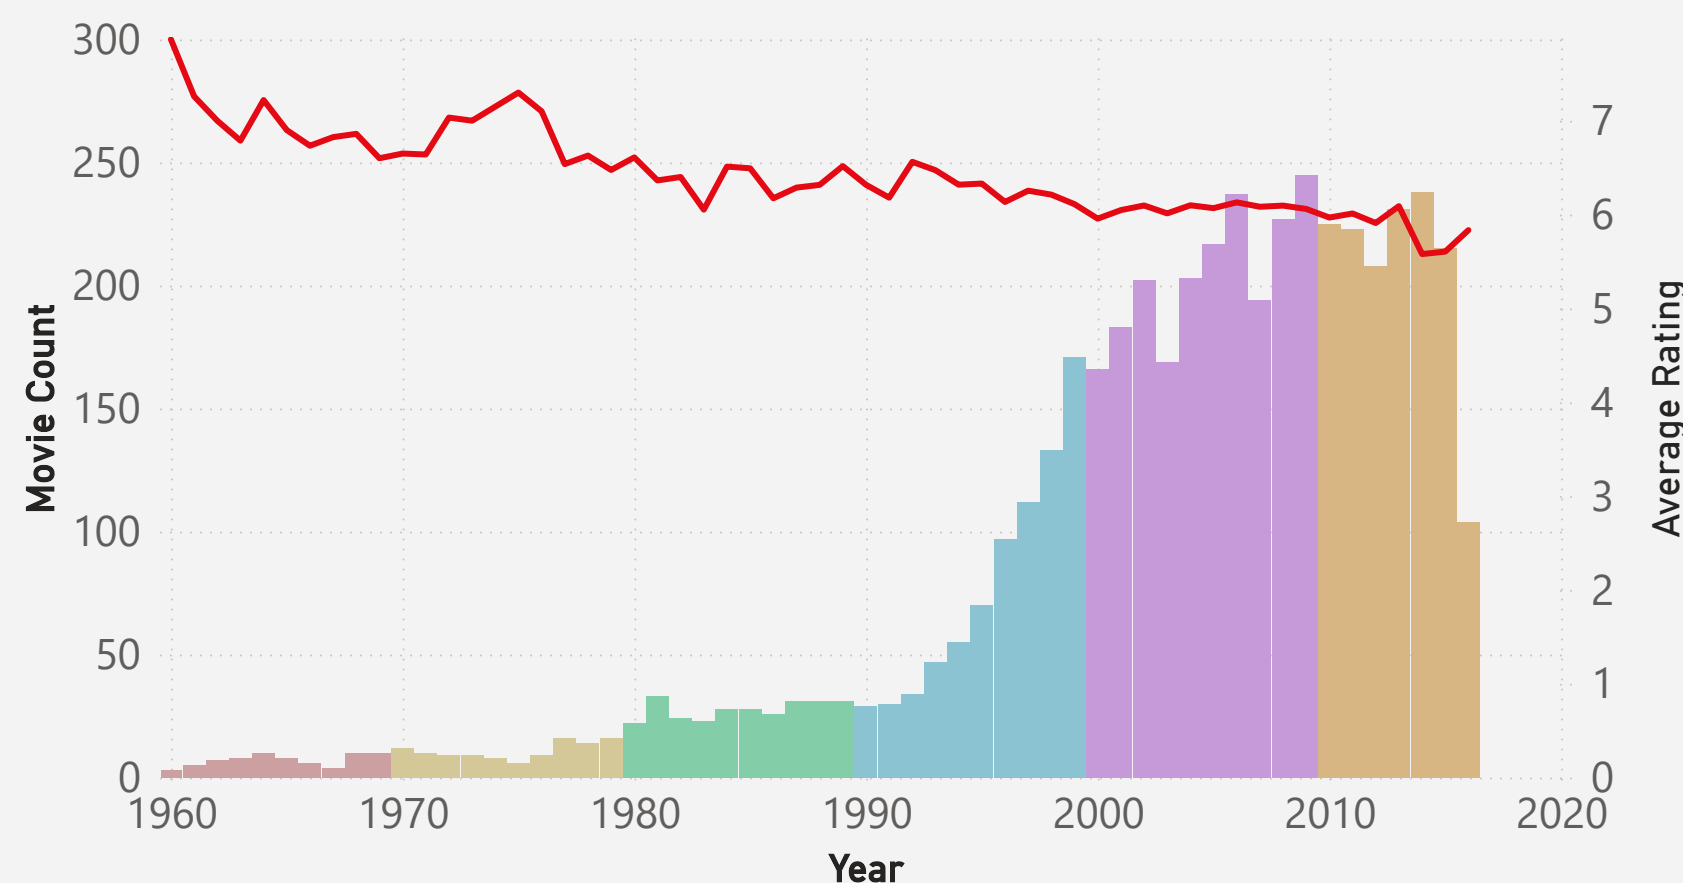

## Average Profit and Roi by Decade

## Budget And Revenue by Decade

## Movie Count and Average Movie Rating per year

The 70s was the second most profitable decade with an average profit of \$53m as well as producing the movies with the highest ROI on average at 500%

The graphs show this is potentially attributed to a lower amount of movies made of higher quality. This suggests that despite an increase in budget and even profit over time, a focus on quality over budget and quantity may be more predictive of success
